#### THE KOCH LYMPH.

All sensational reports about the lymph prepared by Dr. Kocn, which is alleged to a cure for consumption, should be guarded against with the most scrupulou care. Whatever virtue the lymph may have is as yet still conjectural. The varying statements made in regard to its curative power, and the ill result of many of the bowl is concerned. experiments are sufficient reasons for accepting slowly and only after thorough de nonstration what is asserted about the marvellous lymph.

An authority as eminent as that of the world-renowned Vincuow has declared that the efficacy of the lymph, even for the case of lupus, strongly needs demonstra tion, and this very able Professor thinks two or three years of experiment not too temperance. little to establish the real character of Dr. Koch's remedy.

It is not certain that it cures, nor more certain that it will cure, and there is the greatest doubt that its too ready application leads to deplorable results. Reports like those sent out from New Haven are only mischievous, as they assume a certainty which is by no means established.

The child who watches the gray clouds that lower on the day of his school excursion will readily believe any report that the day will be fair. Poor victims, doomed to the wasting touch of consumption, accept

The Congressional Apportionment Bill was taken up yesterday in the House and aroused a very lively discussion. At the present time there are three pretty lvy slips, full of sap and verdant, that spread their leaves in the sunshine of the American metropolis, and look very i'm portant, as they may well do. There are many well-meaning parents who have not the heart to punish their children. This ingenious machine has been gotten up for their benefit. All they have to do is to lock the culprit on the table and leave the room.
The machine does the rest. It will give any
number of strokes to the minute by fixing the
hand on the dial.
